LOGGING IN TO TAPESTRY TOOL

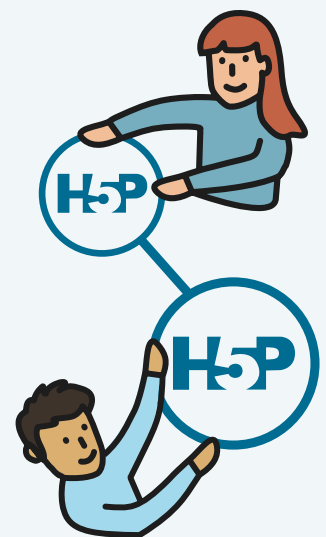

To log in to your Tapestry site:

- 1 Navigate to its home page at [https://ubc.tapestry-tool.com/\[site-name\]](https://ubc.tapestry-tool.com/[site-name]) OR [https://sites.tapestry-tool.com/\[site-name\]](https://sites.tapestry-tool.com/[site-name])
- 2 Click the “login” button on the right, and enter your login details.
- 3 Once logged in, you will be redirected to the home page, where you can create your own tapestry and see others’ tapestries as well.

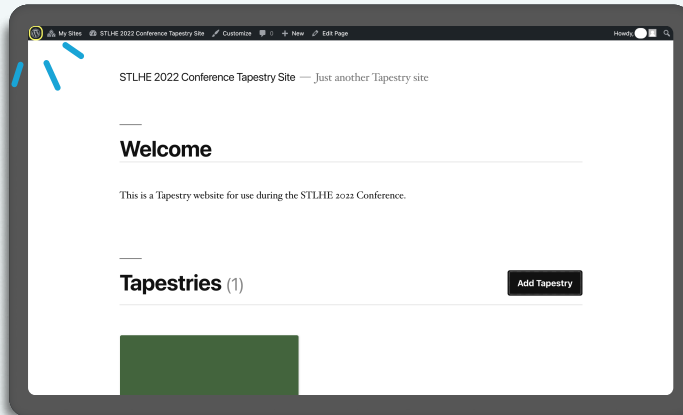

H5P INTERACTIVE WIDGETS

H5P is a WordPress plugin that allows you to create interactive HTML5 content and embed them into your site. H5P allows for the creation of a variety of content types ranging from interactive videos to quizzes to 360 virtual tours. These H5P widgets can be easily made and added to your tapestries to increase interactivity within your Tapestry, and allow your viewers to engage more with your content.

To learn more about the H5P content types, see [Examples and Downloads | H5P](#).

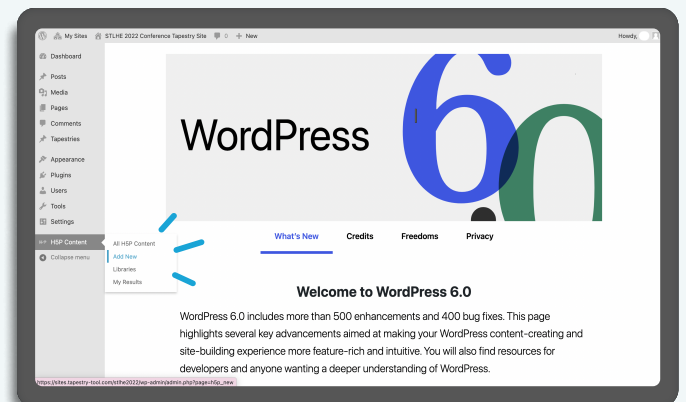

CREATING H5P CONTENT

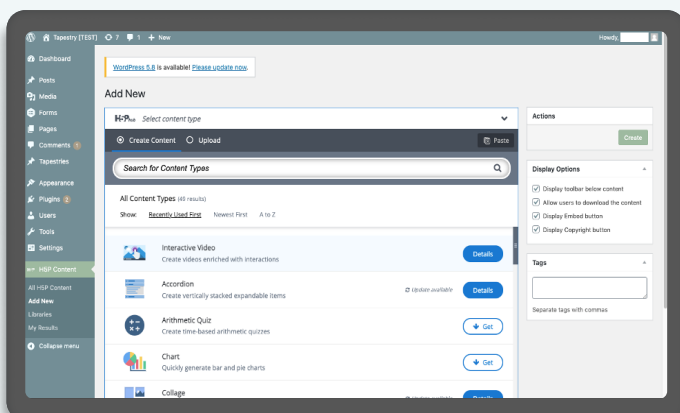

- 1 You will need to be logged in to make H5P content. Navigate to the WordPress homepage by pressing the “W” icon in the top left corner of your page.

- 2 Hover over the “H5P Content” tab on the left-hand sidebar, near the bottom.
- 3 Press on the “Add new” button below “All H5P Content”.

- 4 Choose your content type from the list. (To learn more, see [Examples and Downloads | H5P](#))

- 5 Fill in the relevant information for your H5P post and press “Create” on the right-hand sidebar.
- 6 There are tons of H5P interactive widgets available. On the next page, you’ll see steps on how to make a few of these content types.

HOW TO CREATE AN INTERACTIVE VIDEO

Creating an H5P Interactive Video allows you to add interactivity to your videos, such as quiz questions, external links, and extra resources.

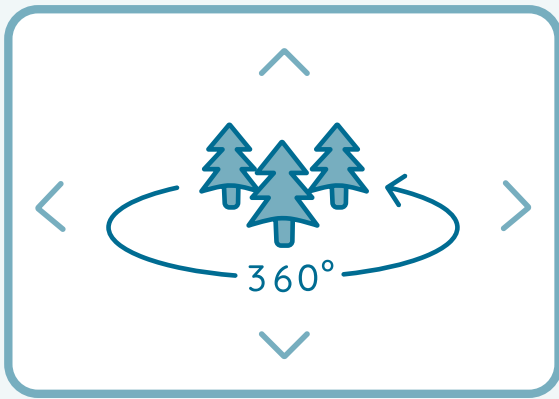

- 1** Choose the “Interactive Video” content type from the drop-down.
- 2** Add your content title under “Title.”
- 3** Press on the plus button under the “Add a video” section.
- 4** (Optional) Add a short description by pressing the “interactive video” dropdown.
- 5** (Optional) Add subtitles to your video by pressing the “text tracks” drop-down, pressing on the “subtitles” drop-down, and then pressing “Add” under “Track source (WebVTT file).”
- 6** (Optional) Change your video settings by pressing on the “Behavioural Settings” drop-down.
- 7** (Optional) Add interactions (e.g., pop-ups, etc.) by pressing on the “Add Interactions” tab near the top of the page.
- 8** When you’re done, click “Create” in the top right-hand corner.

HOW TO CREATE A COLUMN

An H5P Column allows you to present multiple pieces of H5P content within one panel.

- 1** Choose the “Column” content type from the H5P drop-down.
- 2** Add your content title under “Title.”
- 3** Select your first content type from the “content” dropdown. Fill in the details for your first piece of content.
- 4** To move on to the next piece of content in your column, click “ADD CONTENT” at the bottom of the page.
- 5** Repeat this process until you’ve added all your content pieces to the column.
- 6** When you’re done, click “Create” in the top right-hand corner.

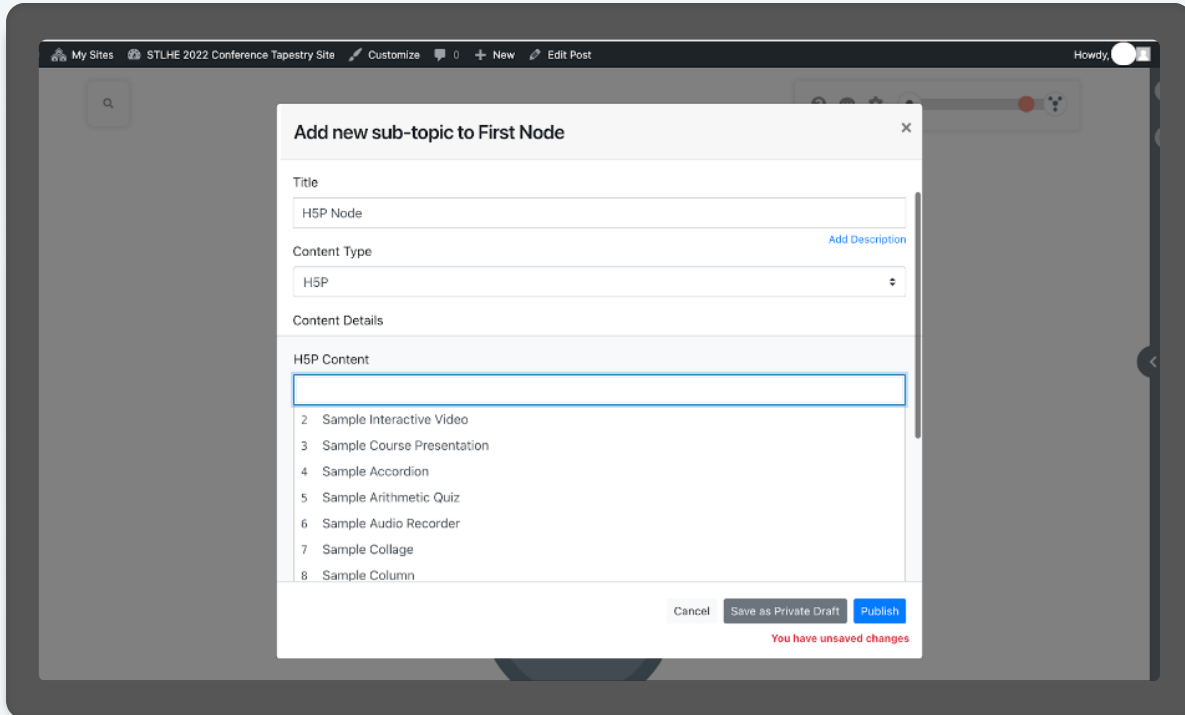

HOW TO CREATE A VIRTUAL TOUR (360)

A Virtual Tour (360) allows you to add interactions to a 360° or static image, which can allow users to navigate to other scenes and environments.

- 1** Choose the “Virtual Tour (360)” content type from the drop-down.
- 2** Add your content title under “Title.”
- 3** Press the “New Scene” button under the image panel.
- 4** Choose whether your image is a “static image” or a “360 image”.
- 5** Add your “scene title”.
- 6** Upload your image under “scene background”.
- 7** (Optional) Add a “Scene description”.
- 8** (Optional) Add an “Audio Track” to your scene.
- 9** Once you have your first scene, you can add interactions to it. Use the “go to scene” button to create links between scenes, and give the impression of moving between environments.
- 10** Once you’ve clicked the “go to scene” button, click the “new scene” button to create the new scene to go to.
- 11** Repeat this process as many times as needed to create your interactive environment.
- 12** When you’re done, click “Create” in the top right-hand corner.

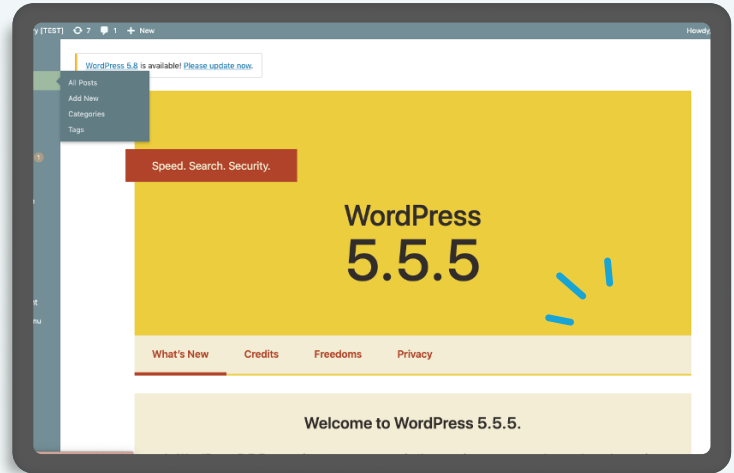

HOW TO UPLOAD H5P CONTENT TO TAPESTRY

- 1 Press on the plus button below the node you'd like to add to.
- 2 Add a title to your node by filling the "Title" box.
- 3 Choose the H5P content type from the "Content-Type" dropdown.
- 4 Choose your H5P post from the dropdown
- 5 (Optional) Add a description for your node by pressing the "add description button" under the title.
- 6 Press "Publish."

HOW TO CREATE WORDPRESS CONTENT

You will need to be logged in to make WordPress content.

- 1 Navigate to the WordPress homepage by pressing the “W” icon in the top left corner of your page.
- 2 Press on the “Posts” tab on the left-hand sidebar.
- 3 Press on the “Add new” button beside the “Posts” title.
- 4 Fill in your content and press publish. (To learn more about how to create WordPress posts, check out the following website: <https://wordpress.org/support/article/writing-posts/>)

ADDING WORDPRESS CONTENT TO TAPESTRY

- 1 Press on the plus button below the node you’d like to add to.
- 2 Add a title to your node by filling the “Title” box.
- 3 Choose the WordPress content type from the “Content-Type” dropdown.
- 4 Choose your WordPress post from the dropdown
- 5 (Optional) Add a description for your node by pressing the “add description button” under the title.
- 6 Press “Publish.”
